

## **THE 8th INTERNATIONAL INDUSTRIAL MINERALS SYMPOSIUM GUIDELINE FOR PREPARATION OF PAPERS**

The manuscript should be prepared according to rules given in this guideline. The rules are important to provide the uniformity throughout the proceedings.

Furthermore, a file named "**PAPER FORMAT.doc**" prepared according to the rules is attached for the author's usage during typing the manuscript. Some lines (title, authors, main and sub headings) are defined with "click and type macro", so that they can be typed directly after clicking on them. When the number of headings are not sufficient it can be added by copy/paste method.

Camera-ready manuscript will be reduced to 75% of original size. Therefore, the manuscript should be typed in **Times New Roman, 14 point**, to provide easier reading of printed material.

### **1) Typing Area :**

- The typing area is 187 mm in width and 272 mm in height on A4 paper size.
- Two columns (column width: 90 mm, gap between the columns: 7 mm) are used for main text, excluding title, author(s) and abstract.

### **4) Headings:**

## 6) Tables, Figures, Photos, Equations :
